The statement of facts relating to the disposition of the body shall be signed by the undertaker or person acting as such.

The medical certificate shall be made and signed by the physician, if any, last in attendance on the deceased, who shall specify the time in attendance, the time he last saw the deceased alive and the hour of the day at which death occurred. And he shall further state the cause of death, so as to show the course of disease or sequence of causes resulting in death, giving the primary cause, and also the contributory causes, if any, and the duration of each. Indefinite and unsatisfactory terms, indicating only symptoms of disease or conditions resulting from disease, will not be held sufficient for issuing a burial or removal permit; and any certificate containing only such terms as defined by the state registrar as indefinite and unsatisfactory, shall be returned to the physician for correction and definition. The International classification of the causes of death shall be used by all physicians in stating the cause of death in the medical certificate. Causes of death, which may be the result of either disease or violence, shall be carefully defined; and if from violence, its nature shall be stated, and whether (probably) accidental, suicidal, or homicidal.

(d) Alter a certificate on file in the office of a local registrar.

STATEMENT OF PLACE OF DEATH

Special attention should be given to the satisfactory completion of EACH portion of this item. The city or town and street address or route number refer to PLACE WHERE THE DEATH OCCURRED. For deaths occurring in hospitals, maternity homes, or institutions, the name of the place and length of stay MUST be stated.

STATEMENT OF USUAL RESIDENCE OF DECEASED

Regardless of the fact that the person may have lived his entire life at the place of death, ALWAYS COMPLETE ALL PARTS OF THIS ITEM. In case a person has resided in the county where death occurred for less than one year, give address of FORMER RESIDENCE. The post office of the deceased may be in a county or state other than the county of actual residence.

IDAHO CODE ANNOTATED—CHAPTER 38, SECTION 206.

The personal and statistical particulars (items 1 to 16) shall be authenticated by the signature of the informant, who may be any competent person acquainted with the facts.

The statement of facts relating to the disposition of the body shall be signed by the undertaker or person acting as such.

The medical certificate shall be made and signed by the physician, if any, last in attendance on the deceased, who shall specify the time in attendance, the time he last saw the deceased alive and the hour of the day at which death occurred. And he shall further state the cause of death, so as to show the course of disease or sequence of causes resulting in death, giving the primary cause, and also the contributory causes, if any, and the duration of each. Indefinite and unsatisfactory terms, indicating only symptoms of disease or conditions resulting from disease, will not be held sufficient for issuing a burial or removal permit; and any certificate containing only such terms as defined by the state registrar as indefinite and unsatisfactory, shall be returned to the physician for correction and definition. The International classification of the causes of death shall be used by all physicians in stating the cause of death in the medical certificate. Causes of death, which may be the result of either disease or violence, shall be carefully defined; and if from violence, its nature shall be stated, and whether (probably) accidental, suicidal, or homicidal.

The statement of facts relating to the disposition of the body shall be signed by the undertaker or person acting as such.

The medical certificate shall be made and signed by the physician, if any, last in attendance on the deceased, who shall specify the time in attendance, the time he last saw the deceased alive and the hour of the day at which death occurred. And he shall further state the cause of death, so as to show the course of disease or sequence of causes resulting in death, giving the primary cause, and also the contributory causes, if any, and the duration of each. Indefinite and unsatisfactory terms, indicating only symptoms of disease or conditions resulting from disease, will not be held sufficient for issuing a burial or removal permit; and any certificate containing only such terms as defined by the state registrar as indefinite and unsatisfactory, shall be returned to the physician for correction and definition. The International classification of the causes of death shall be used by all physicians in stating the cause of death in the medical certificate. Causes of death, which may be the result of either disease or violence, shall be carefully defined; and if from violence, its nature shall be stated, and whether (probably) accidental, suicidal, or homicidal.
